Education

Chandigarh University

Bachelor of Engineering in Computer Science

Aug. 2022 – May 2026

Mohali, Punjab

Experience

Data Analyst Intern

January 2026 – March 2026

RegSurance

Remote

- Processed 100K+ records by consolidating multi-source datasets using Excel and SQL, improving data quality and consistency
- Built SQL-based pipelines to aggregate and analyze packaging data at SKU level, enabling structured reporting
- Cleaned and transformed data through unit standardization, missing value handling, and category normalization
- Generated analytical and regulatory reports, uncovering key insights including 74% waste contribution from a single SKU
- Applied business logic for material classification and resolved data gaps to ensure accurate, decision-ready outputs

Projects

HR Attrition Analytics Dashboard | *SQL Server, Power BI, DAX, Data Modeling*

January 2026

- Built an end-to-end HR analytics solution analyzing 10,000 employee records to identify key drivers of employee attrition and attrition patterns.
- Designed SQL tables and ingested data using bulk insert methods; validated real-time data updates by inserting new records post-dashboard creation.
- Developed Power BI dashboards with KPI cards to track a 22.47% attrition rate, total attrition, active employees, and average age.
- Identified higher attrition in the Cyber Security department and roles such as Consultant, QA Analyst, IT, and Software Engineer.
- Analyzed factors including overtime, business travel, distance from home, salary hikes, job satisfaction, and work-life balance to support data-driven retention strategies.

Hotel Booking Analysis Dashboard | *Power BI, DAX, Power Query, Data Modeling*

December 2025

- Built an end-to-end interactive Power BI dashboard analyzing 5,000 hotel bookings, focusing on booking behavior, cancellations, revenue performance, and customer loyalty segmentation.
- Performed data cleaning and feature engineering using Power Query, creating weekday/weekend classification, booking lead-time buckets, and loyalty-based customer segments.
- Created DAX measures to calculate key hospitality KPIs including 28.6% cancellation rate, \$1M total revenue, and \$148.1 average room rate.
- Tackled the issue of inconsistent customer retention by analyzing loyalty-based booking behavior and uncovering patterns driving cancellations and repeat bookings.
- Analyzed loyalty-based booking behavior, identifying lower cancellation rates among loyalty members and higher revenue contribution compared to non-members.

Technical Skills

Languages: SQL, Python

Databases: MySQL, PostgreSQL

Data Analysis & Concepts: Data Cleaning, Data Modeling, EDA, Data Visualization, KPI Analysis

Visualization Tools: Power BI (DAX, Power Query), Excel (Pivot Tables, VLOOKUP/XLOOKUP)

Tools: Git, GitHub
